

Exercises for Spatial Databases and GIS

Sheet I I (until 05.02.2016)

Exercise 1 (Geometric Errors, Radar)

1. Where do you have to be in the picture below to capture a radar image without foreshortening and without layover?

2. Where do you have to be in the picture below to capture a radar image without layover and without shadow?

3. Why is it impossible to capture a radar image without distortions?
